

Madrid in details:

1. According the report that shows about the city of Madrid, Madrid is the third largest city in the world and because of that you'll find their people depends on their cars as the first solution for transportation.
we concluded from the report that the most of people who live in Madrid own their own cars from the huge numbers of car in the city. As the report shows here there is a 1.26 million cars in Madrid which mean 39.6 cars for each 100 people and that's what we can call it a huge number.
2. As we can see in report 's Madrid there is an increase on the numbers of the newborns and deaths by estimated 1,98 natural increase. we can say here the old people are die a lot and newborns are increase so from that we concluded that the most of Madrid population are young.
3. according to the report we can say the Spanish people who lives in Madrid is 87,9% from the total of all population which is 3,18 people witch mean Madrid is a city that has a small percentage of non-national population.
